Prevents heat loss and air infiltration
6. Fiberglass screen mesh
7. Galvanized steel reinforcing
8. Primed wood frame

Add internal blinds to your sliding patio door and you can choose anywhere between a full clear view and complete privacy (blinds sealed between two glass panes).

Blinds travel between two privacy rails, which block light around the edges when the blinds are closed.

Tilt Open / Close

Raise / Lower

Adjust the amount of light that enters your home. You can open, close, raise or lower your blinds without ever having to clean a single blade.
